# NEW ENGLISH CHRYSANTHEMUMS

You who have been buying and growing this new race of Chrysanthemums the last several years that we have been selling them, need no introduction to these superb Chrysanthemums that can be grown right out in your garden to the size of the big greenhouse varieties, providing you give them the same good care that the greenhouse grower would give to his flowers.

We have received good reports from customers all over the country that purchased these Chrysanthemums from us. Everybody is enthusiastic about them.

Plant in good sunny location on ground that was fertilized the previous fall or at the time of digging. If possible mix a tablespoon of bonemeal into each hole when you plant them. When plants are well started, pinch out the center of each. Then if you want extra large flowers leave just 6 or 8 shoots to the plant and just one bud to the shoot. If you do not care for the exhibition size flowers they do not need any thinning or disbudding except the pinching out the tops of the plant after growth is first started. They will make nice cut flowers and garden decoration without disbudding.

You owe it to yourself to give these English Chrysanthemums a good trial.

IF POSSIBLE, MENTION A FEW SECOND CHOICE VARIETIES. SOME OF THE STOCK IS STILL SCARCE AND THE DEMAND HAS BEEN GREAT.

These are nice strong single plants grown from rooted cuttings.
